

It's never too late to educate -

Let's do our part, and chart!

- Reminder: patient's "Education" should be charted ONE time per SHIFT!
- How to chart:

← chart on **any area** that pertains to your patient (as long as at least one space is filled out)

Another way to chart Patient Education:

- Interdisciplinary Plan of Care – Daily Task:
 - Charting under "Problems - All Disciplines Chart Here" keeps information until discharge
 - Under "Intervention", you can type the education you completed for patient

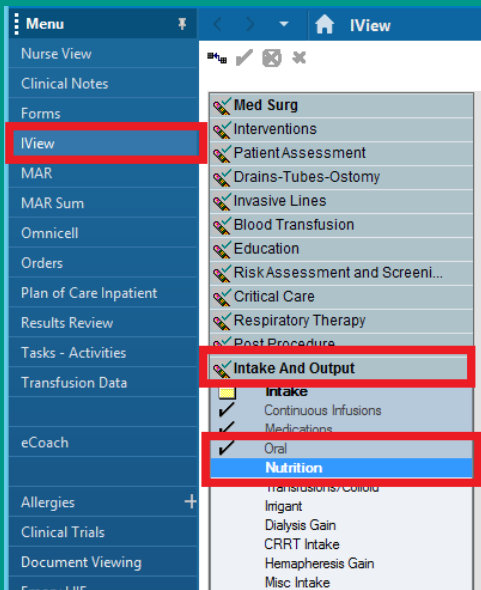

The screenshot shows the 'Interdisciplinary Plan of Care' form. The 'Problems - All Disciplines Chart Here' section is highlighted in yellow. It includes a table for daily goals and a table for problems with interventions. The 'Intervention' column is highlighted in cyan.

Date	Problem	Problem Status	Goal	Intervention	Outcome	User Name	User Role
4/13/2022	decreased mobility	Active	increase mobility	daily amb in hall	going	Jim Johnson, PT	<MultiAlpha>
<Date>	<Alpha>						<MultiAlpha>

It's about *thyme* we chart our meals!

Patient's nutrition intake is a big *dill*.

- Reminder: patient's "Diet % Eaten" should be **charted every 4 hours** – even if it's zero!
- How to chart:

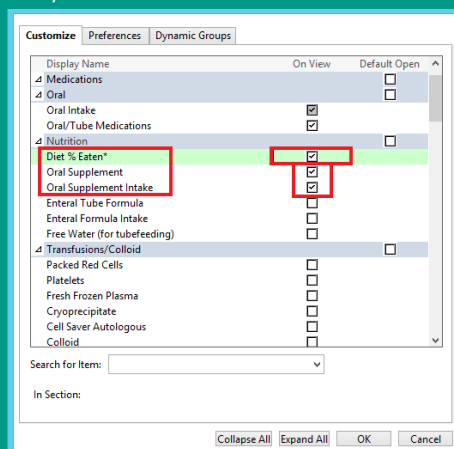

Oral Intake	mL					400
Oral/Tube Medications	mL					400
Nutrition						
Diet % Eaten*	%					

If you do NOT see "Nutrition" in iView under Intake & Output, follow instructions below:

1) Click "pencil icon" in upper left corner under Intake & Output

2) Click "check mark" next to "Diet % Eaten", and any additional nutrition charting you would like to add.

3) Type in % of meal eaten, and, if applicable, select the oral supplement consumed and amount.

Nutrition						
Diet % Eaten*	%	75				
Oral Supplement		Renal dialy...				
Oral Supplement Intake	mL	220				

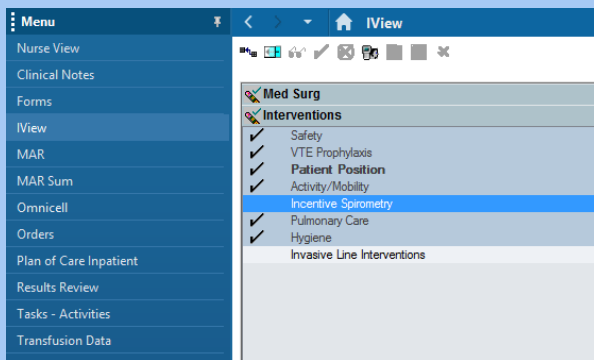

Help your patient exercise their lungs!

Incentive Spirometry is what keeps them strong and working well.

- Check if patient has order for “Incentive Spirometry at Bedside”

Patient Care		
<input checked="" type="checkbox"/>		Incentive Spirometry at Bedside Ordered 04/22/22 15:21:00 EDT, Instruct patient for self-use

- Reminder: if ordered, patient's “Incentive Spirometry” should be **charted every 4 hours** while awake or PRN – even if it's not done!
- How to chart:

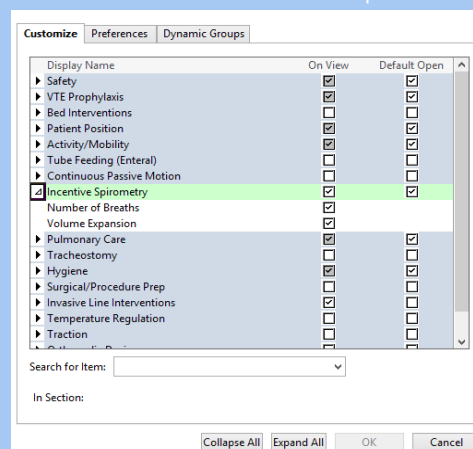

Incentive Spirometry	
Number of Breaths	
Volume Expansi... mL	

If you do NOT see “Incentive Spirometry” in iView under Interventions, follow the instructions below:

1) Click “pencil icon” in upper left corner under Interventions

2) Under “Incentive Spirometry” click the box for “Default Open.” Make sure to check Number of Breaths and Volume Expansion!

3) Every 4 hours, while awake and PRN, document the number of breaths and Volume expansion amount.

Incentive Spirometry	
Number of Breaths	
Volume Expansi... mL
